

Walking Through the Anthropocene

Initiating the Changes Needed to Live on Earth Differently

SUMMARY OF THE TRAINING

- ▶ **Prehistory of the Societies↔Biosphere relationship**
Ruddiman's hypothesis, fragile island ecosystems, megafauna extinction, past landuse
- ▶ **Present State of the Biosphere**
Forests, oceans, biodiversity hotspots, vulnerable ecosystems, protected areas
- ▶ **The Anthropocene: main indicators**
World GDP, biodiversity crisis, anthropogenic emissions, population, etc.
- ▶ **Human Ecological Footprint**
Concepts and components of the ecological footprint, Canadian ecological footprint
- ▶ **Outdated Beliefs**
Ideas that shape our relationship with nature and with others
- ▶ **The Weight of Myths**
Wrong common sense ideas at the root of the Anthropocene
- ▶ **Sustainable Development**
Definition and implementation of sustainable development in our societies
- ▶ **Energies, Resources and Consumption**
Energy sources, resources extraction and consumption habits in the Western World
- ▶ **Scenarios for Tomorrow**
The paths awaiting us, pitfalls to avoid, thresholds not to transgress, the ways to follow
- ▶ **Case Studies**
Past lessons and present examples
